SUBJECT: **Operational Memorandum #15-06**  
Modifications to the list of USDA-approved Nutrient Analysis Software

This is to inform you of a recent change to the list of USDA-approved Nutrient Standard Menu Planning (NSMP) and School Meals Initiative (SMI) nutrient analysis software available to meet SMI requirements. *Meal Tracker Menu Planning (formerly Simple Menu Planning)* from Accu-Scan Division has not met the USDA requirements for use in conducting nutrient analyses for NSMP and SMI requirements for the 2007-2008 school year. The USDA-approved status for *Meal Tracker Menu Planning* will expire on July 1, 2007, because the software was not updated to include the most recent Child Nutrition Database Release 10.

If you currently use *Meal Tracking Menu Planning* you can use it until the end of the 2006-2007 school year. After that you will have to use one of the USDA-approved software programs. The current list of USDA-approved software programs can be found at:
