Media Selection

MEDIA are the materials used by artists to create art. Some artists work with one “medium” and other artists choose to work with several. A work of art made with more than one “medium” is called a **MIXED MEDIA** work of art.

You will choose from the list below which media you will use in your mixed media landscape. Use the media listed to explore what each can do and complete the chart. Use the chart to make the best choices for your landscape.

Consider the following...Can you create a range of values?
 Is the media easy to use in small areas?
 Can you blend it?
