DESCRIPTION	<p>Bolton is currently expanding the range of services to grade K-8 students. An enrichment coordinator works with K-5 teachers to provide enrichment options in their classrooms. Identified students in grade 5 also have opportunities to participate in small group investigations. Opportunities for middle level (6-8) students in programs and competitions such as Future Problem Solving, Connecticut Invention Convention, and FIRST Lego League are also available. In the past, after-school enrichment clusters were offered for grades 3-8, which we hope to continue. Bolton is in the process of building its program to meet the needs of its students. Presently, we have one full-time enrichment coordinator for grades K-8.</p>
