

**GRADE THREE – CONTENT STANDARD #7**

**ASSESSMENT A**

Permission Granted

**PEANUTS**

The students in Ms. Hartman’s class bought some peanuts that come in small bags. Each student in the class reported how many peanuts were in his or her bag. Here are the results:

Number of Peanuts in a Bag

14      17      15      16      16      18      21      13      15      14      15  
15      16      17      17      19      17      16      19      15      19

If someone asked you “About how many peanuts are in a bag?” what would you say? How many possible answers are there? Explain the reasons for your answer or answers.
