

**GRADE FIVE – CONTENT STANDARD #3  
ACTIVITY G**

**DECKS AND DECKS OF CARDS**

How would you solve this problem? With your group, estimate the number of playing cards that would be required to “wallpaper” the front wall of the classroom. Discuss your ideas and write them below.

Agree upon a method to solve the problem and write it below.

Explain why you chose this method of estimation.

Write your estimate below. Show all work.

**A.155**
