CONNECTICUT SPECIAL EDUCATION PARENT SURVEY

DATA BRIEF

Region 15 Nexus District

PREPARED BY: GLEN MARTIN ASSOCIATES
41 STATE STREET, SUITE 604-02
ALBANY, NY 12207

INTRODUCTION

The Connecticut Special Education Parent Survey is the continuation of an ongoing collaborative effort between the Bureau of Special Education and the Connecticut Parent Work Group to collect information on family satisfaction and parents' involvement in their child's special education program.¹ The 2014-15 survey was sent to 18,634 parents of children receiving special education services, ages 3 through 21, across 56 school districts.² A total of 3,965 surveys were returned, representing a response rate of 21.3%. The survey is in its tenth year, with the 2014-15 school year marking the first year of a new three-year survey cohort cycle. The survey continues to serve as the chief instrument for collecting parent involvement data for Indicator 8 of the state's IDEA Part B State Performance Plan (SPP).³

PURPOSE OF THIS REPORT

The purpose of this report is to provide survey results for the Region 15 Nexus District in an easy-to-use format.⁴ The intent is to highlight potential areas of strength for your district and areas that may need improvement. Your district's survey results, especially when used in conjunction with other data at your disposal, can provide insightful information for use in decision-making and improvement planning. A few tips for reviewing your survey data include the following:

- Use the survey delivery and response statistics to set the context of your data.
- Review the "total agreement" by survey item to get a general sense of how well your district is doing in each of the six topic areas of the survey.
- Contrast "total agreement" with "high-level agreement" in order to identify survey items where the total percentage may include a sizable lukewarm response (i.e., slightly agree).
- Examine parents' comments for areas of satisfaction, areas of concern, and suggested improvement steps.
- Consider how your district's results compare to the overall statewide results.

¹ The Parent Work Group is a statewide stakeholder group that examines parent involvement data as an indicator of parent satisfaction for annual reporting to the Office of Special Education Programs.

² In the majority (n=45) of districts, surveys were sent to all parents of children receiving services. However, in 11 districts, a simple random sample of students was selected. (See Appendix B.1 for more information.)

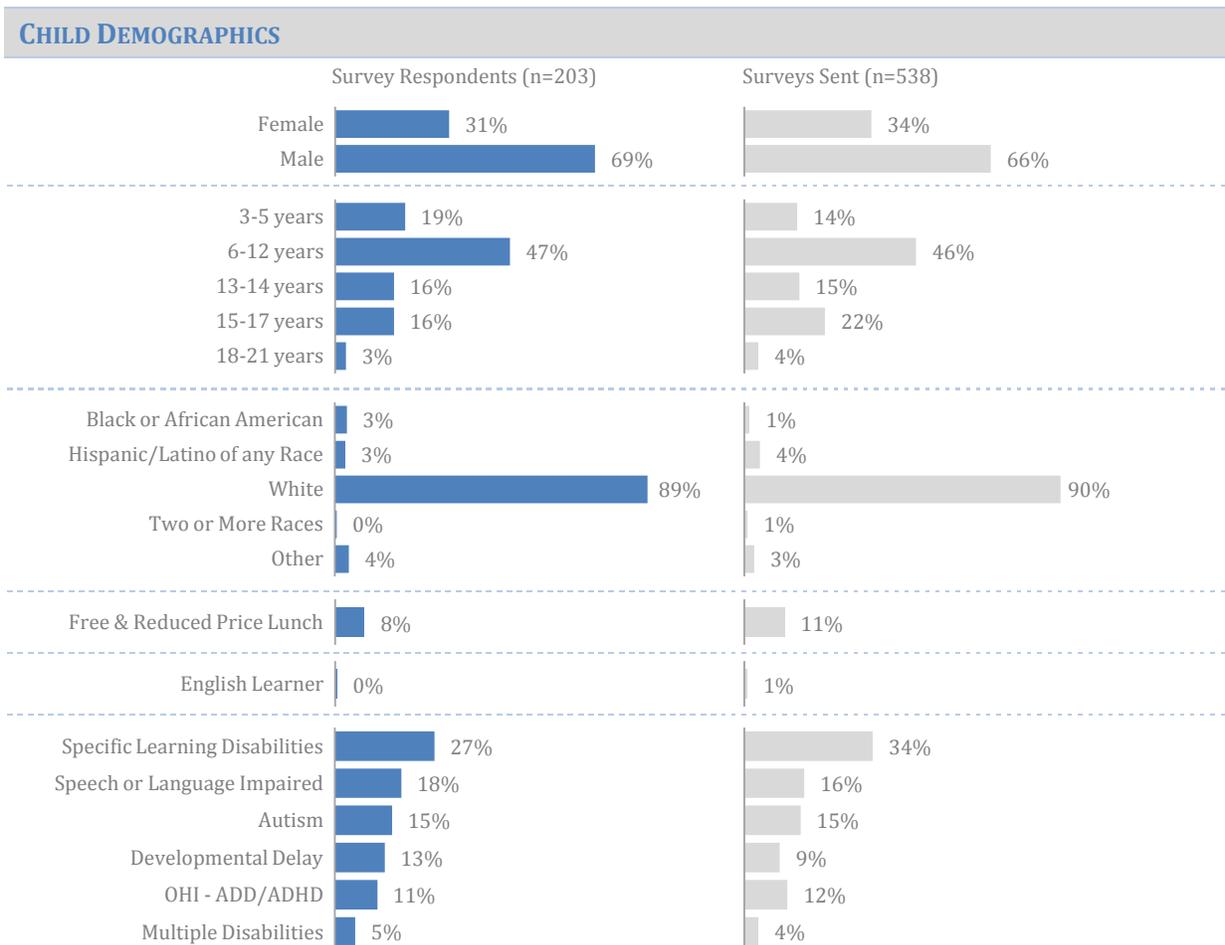

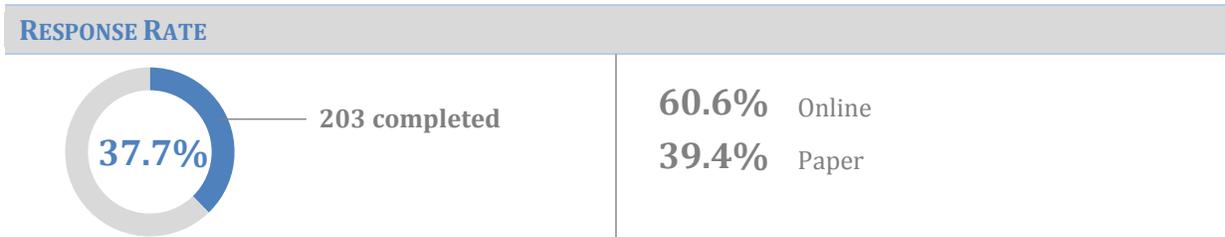

³ SPP Indicator 8 measures the percent of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities. Survey item 10 is the primary measure for this indicator.

⁴ The 2014-15 Connecticut Special Education Parent Survey Statewide Report will be available on the Department website in early 2016.

SECTION I: SURVEY DELIVERY AND RESPONSE

In August 2015, the 2014-15 Connecticut Special Education Parent Survey was distributed to parents of children with an Individualized Education Program (IEP) or Services Plan. Parents were mailed a survey packet, with some parents also receiving an email about the survey. All materials were available in English and Spanish, and the survey could be completed on paper or online. The survey deadline was September 18, 2015. The following graphics provide survey delivery and response statistics for the Region 15 Nexus District.

DELIVERY METHOD			
Mail	538	Mail Non-Deliverable Rate	0.7% (n=4)
Email	90.5% (n=487)	Email Non-Deliverable Rate	3.1% (n=15)

Note: The disabilities displayed are those that are 5% or greater in the survey respondent group or the survey sent group.

SECTION II: SURVEY RESULTS

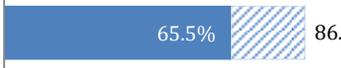

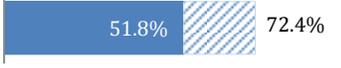

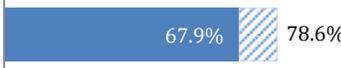

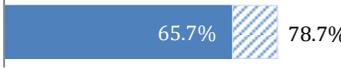

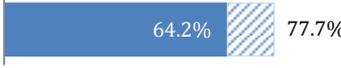

The 2014-15 survey included 38 items that asked parents to rate on a 6-point scale from “strongly disagree” to “strongly agree” their experiences with their child’s special education program over the past 12 months.⁵ The following tables include bar charts that illustrate parents’ “high level of agreement” (i.e., strongly agree and moderately agree), as well as a column with the percentage to express “total agreement” (i.e., plus slightly agree). Only the agreement response options are included to allow for a quick visual comparison across survey items; however, all response options for the Region 15 Nexus District are included in Appendix A.1.

	HIGH LEVEL OF AGREEMENT	TOTAL AGREEMENT
<i>Satisfaction with My Child’s Program</i>		
1. I am satisfied with my child’s overall special education program. [n=202]	 41.1% 74.8%	86.6%

<i>My Child's Skills</i>		
30. My child is learning skills that will enable him/her to be as independent as possible. [n=198]	49.0% 76.8%	84.3%
31. My child is learning skills that will lead to a high school diploma, further education, or a job. [n=195]	48.2% 75.9%	86.7%
<i>Transition Planning</i>		
32. I am satisfied with the school district's transition activities that took place when my child left Birth to Three. [n=33]	72.7% 78.8%	87.9%
33. I am satisfied with the way secondary transition services were implemented for my child. [n=39]	33.3% 61.5%	82.1%
34. When appropriate, outside agencies have been invited to participate in secondary transition planning. [n=33]	27.3% 42.4%	48.5%
35. The PPT introduced planning for my child's transition to adulthood. [n=39]	30.8% 66.7%	71.8%
36. The school district actively encourages my child to attend and participate in PPT meetings. [n=40]	65.0% 87.5%	95.0%
37. The PPT discussed an appropriate course of study at the high school for my child. [n=40]	37.5% 72.5%	85.0%
38. The PPT developed individualized goals for my child related to employment/postsecondary education, independent living and community participation, if appropriate. [n=40]	30.0% 55.0%	65.0%

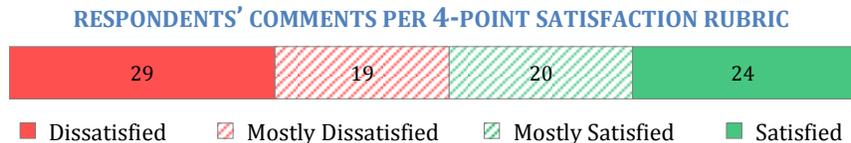

Note: Respondents were instructed only to answer item 32 if their child had transitioned from the Birth to Three System to Preschool within the past three years, and only to answer items 33-38 if their child was 15 years of age or older at their last PPT meeting.

Due to limited space on the bar graphs, the data label for "strongly agree" is not included if it is less than 15%.

SECTION III: PARENT COMMENTS

An open-ended section at the end of the survey asked parents to comment on their overall experience with their child’s special education program. Of the 203 surveys completed by parents in the Region 15 Nexus District, 46.3% (n=94) included written comments. The comments were classified according to a 4-point rubric: “1” if the comment conveyed complete dissatisfaction; “2” if mostly dissatisfied; “3” if mostly satisfied; and “4” if the comment conveyed complete satisfaction. The breakout along the 4-point rubric is provided below, followed by examples of parents’ feedback.⁶

Note: The comments of two respondents were not coded because the remarks could not be classified as either a reflection of satisfaction or dissatisfaction with their child’s program.

COMMENTS EXPRESSING SATISFACTION

- *We are very pleased with the care our son is receiving. He is progressing in his skills, and is moving forward both academically and socially. His regular education teachers and special education teachers have worked collaboratively to meet his needs.*
- *This past year in particular was stellar for my son. His team was very helpful and did much to encourage him both academically and socially. His classroom teacher worked with him as much as she could. His aide was a perfect match, and the flex room and special education teacher are a great asset to my son's education.*
- *Classroom teachers, special educators and paraprofessionals are top notch. Other personnel like behaviorists, speech teachers, etc. are available as ongoing resources. All have seemed genuinely invested in my child's education and success. I have found that every reasonable request I have made for my child to-date has been honored.*
- *The school district, especially the special education teachers at high school are excellent. The teachers are very engaged and willing to explore different ways of teaching my child. The PPT meetings are highly collaborative and supportive of the parents as well as our child. We cannot express more positively how pleased we are with the high school special education teachers.*
- *I have been very satisfied with the special education services that have been provided to my child. Region 15 schools have been very accommodating and have helped my child begin to succeed in areas that were of previous struggle both in the classroom and at home.*
- *We could not be more pleased with the services provided for our child by our district. The teachers and service providers exemplify the true meaning of dedication to our child and her education. They ensure that all of her needs are met and go beyond expectations when it comes to communication with us. We are always kept up-to-date on her progress and are given exercises that we can work on with her at home. We feel it is a true team with our daughter's best interest and success in mind.*
- *Our experience with the teachers has been outstanding with excellent teaching and specialized services. I would like to acknowledge the special education teacher for her dedication to providing a caring environment to foster best learning. The support staff, aides and special needs service providers sincerely care for my child's well-being and educational development. A great transitional group has been put in place to continue his growth.*
- *Our experience has been all good! We have worked together with the school as a team – because of that, our child's future is bright. We couldn't ask for more support. This special education system is truly wonderful!*
- *My child's special education teachers have been fantastic. They really understand my child's strengths and weaknesses. They are helping him develop needed skills and confidence. I cannot say enough about the teachers he had at elementary and middle school!*

⁶ Comments are reported verbatim with the following exceptions: 1) comments received in Spanish were translated; 2) silent corrections were made to improve readability; and 3) all identifying information was removed to maintain respondent confidentiality. In some cases, multiple excerpts may have been taken from one or more respondents’ comments.

- *We only had positive experiences with the special education program. The teachers, administrators, and staff have been more than supportive. They have always put our son's needs first and have always made accommodations for his learning style. Our son has made more progress than we ever thought possible. We owe this to the dedicated teachers and staff who have worked with him.*
- *Region 15 is absolutely astounding. They go way above and beyond for my son. He has made tremendous gains thanks to the services he has been provided.*
- *I cannot say enough about the incredible team of teachers and support staff that we have been working with. Every time we leave a meeting with them I am so impressed with how they handle my child's education. I feel truly fortunate to have these teachers involved in my child's school and extremely grateful for their hard work and dedication.*

COMMENTS EXPRESSING DISSATISFACTION

- *Our experience since our daughter has entered special education has been extremely frustrating and stressful, to say the least. We have had to constantly advocate and even battle with the school system in order to get our daughter's needs met even if it did not involve any further cost to the district. In general, we do not believe our position on our daughter's needs is respected.*
- *It has been frustrating how slow it is to make changes to my child's placement and/or to obtain homebound tutoring when appropriate. Things that should take weeks instead take months.*
- *I have received emails and talked to regular education and the specials teachers that told me they did not know my child was special education, and therefore modifications and accommodations were not followed. Very little communication with parents.*
- *The administrators should be more educated on types of special needs and how all special needs children don't react and learn the same way.*
- *It would be good to train aides in special education and to be a lot more compassionate to children.*
- *Overall, there is a lack of respect for the parent's input and a lack of parental support. Lack of help facilitating the child's participation in clubs and sports, and especially a lack of social skills groups for children.*
- *I feel the school doesn't have enough resources to accommodate the elective classes. My child was having difficulty in a class and was told to switch to another because they didn't have the resources to allow an aid in the class. My child would have benefited more from the first class than the second.*
- *Our school needs to have more resources for students with behavioral difficulties. There needs to be more focus on how to address behaviors in a productive, not always punitive way. Most of the teachers my son has had have been wonderful. However, those who have not have set him back significantly, both academically and emotionally. There should be a focus on teaching teachers/staff/other students not just tolerance, but acceptance of kids with special needs.*
- *Much more communication is needed between parents and teachers/aides. Communication books are vague and not detailed, and parents rarely have the opportunity to see and talk to teachers. This is very difficult for parents with nonverbal children. There should be more opportunities for volunteering and being involved in the classroom.*
- *I would love to see more after school activities for my child. There are a great deal of activities for her typically developing peers, but nothing I am aware of that my daughter can participate in. I understand the additional cost involved can be difficult on most already strained school district budgets. It would be nice to see school districts moving in this direction, so that my child and others like her can feel more a part of the school community.*
- *Limited resources based on limited budgets. Teachers do not consistently follow through on modifications and strategies. Class size and lack of training may be a cause.*
- *Overall, my child's experience with special education has been poor. While some teachers (special and regular education) may have been personally invested, their professional knowledge and skills were strongly lacking in addressing special education needs of my child. When questions were presented that may delve into these areas that appeared weaker, the professionals' responses seemed arrogant and even obtuse. Seemingly, as a result of their unwillingness to grow or possibly learn more as educators, my child's special education experience has been poor and we have little trust in their ability to help develop the necessary skills.*
- *I feel that an inexperienced teacher poorly managed my child's early transition years. My child seems to be on the right track now, but may have been greatly hampered by the lost initial transition.*

- *The special education teacher assigned to our child was not very supportive. Her communication between parents and regular teachers was poor. Her ability to help strengthen our son's weaknesses was poor. We feel that it would be more effective if the same special education teacher were assigned to a student for the duration of their time at each school.*
- *I wasn't made aware that my child was going to have new aides and a new teacher. This more than likely caused more anxiety for my child to not to want to go to school.*
- *Support networks are not aligned with our district. They are private groups. The school district should provide this support. It would create goodwill and better cooperation.*

APPENDIX A.2: REGION 15 BOX-AND-WHISKER CHARTS

The following box-and-whisker charts provide a visual snapshot (by survey item) of your district's mean score relative to the mean score of all other districts participating in the survey.⁷ The mean district score represents the average parent response scaled from 1="strongly disagree" to 6="strongly agree."⁸ An illustration of how to interpret your box-and-whisker charts is provided in the following diagram. A box for each survey item contains the middle 50% of districts and the median (middle) district score is represented by a black line within the box.⁹ The "whiskers" on the box represent the minimum and maximum mean scores across all districts and your individual district is represented by a round dot (●). Thus, if your mean district score was inside the box, it would be considered an average rating; if your mean district score was in the lower "whisker," it would be considered a below average rating; and if your mean district score was in the upper "whisker," it would be considered an above average rating. Mean district scores were not calculated when five or fewer respondents in the district answered an item. If this was true of your district, a round dot (●) will be missing for those items.¹⁰

How to Interpret Your Box-and-Whisker Chart

□ Contains the middle 50% of mean district scores on Question 1.

● Represents the mean score for your district on Question 1.

Result: The mean score for your district is below the mean score of the "middle" scoring district but is within the middle 50% of all mean district scores for this question.

Note: The mean district score represents the average response scaled from 1="strongly disagree" to 6="strongly agree."

⁷ Survey responses from 11 districts were excluded due to the CSDE standard (n=20) for confidential reporting of district-level data.

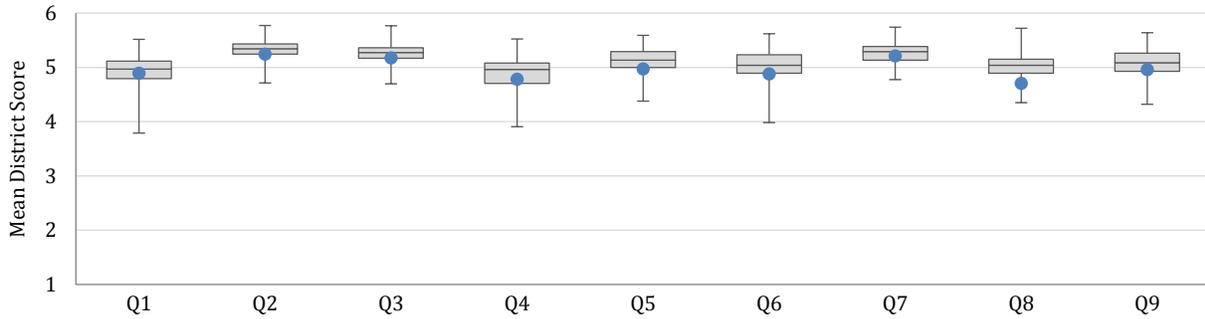

⁸ The response option of "don't know" was not included in the calculation of the mean score, as there is no intuitive ordering for this response.

⁹ Survey item 22 is negatively keyed (i.e., strongly agree is equivalent to a high level of dissatisfaction); therefore, this item was excluded from the analysis to maintain a consistent interpretation of mean scores.

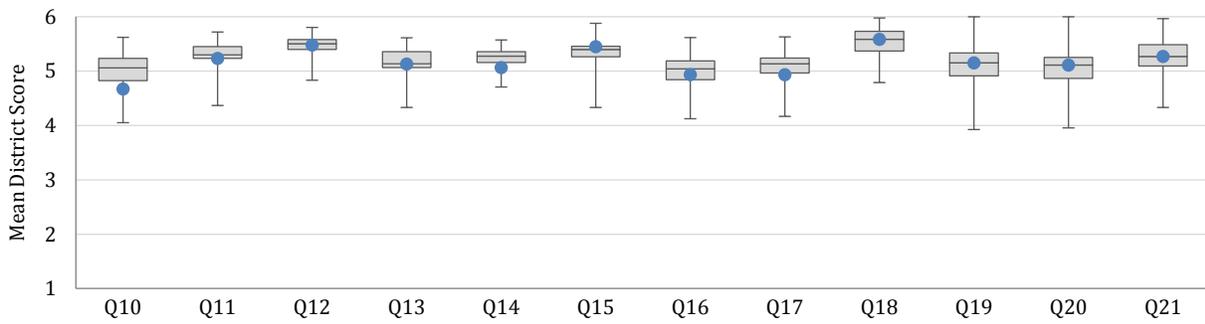

¹⁰ A substantial number of districts had five or fewer respondents on the transition planning items. As a result, 15 districts were excluded from calculations for survey item 32 and seven districts were excluded from calculations for survey items 33-38.
