## INTRODUCTION

The Connecticut Special Education Parent Survey is the continuation of an ongoing collaborative effort between the Bureau of Special Education and the Connecticut Parent Work Group to collect information on family satisfaction and parents' involvement in their child's special education program.<sup>1</sup> The 2014-15 survey was sent to 18,634 parents of children receiving special education services, ages 3 through 21, across 56 school districts.<sup>2</sup> A total of 3,965 surveys were returned, representing a response rate of 21.3%. The survey is in its tenth year, with the 2014-15 school year marking the first year of a new three-year survey cohort cycle. The survey continues to serve as the chief instrument for collecting parent involvement data for Indicator 8 of the state's IDEA Part B State Performance Plan (SPP).<sup>3</sup>

## PURPOSE OF THIS REPORT

The purpose of this report is to provide survey results for the Rocky Hill Nexus District in an easy-to-use format.<sup>4</sup> The intent is to highlight potential areas of strength for your district and areas that may need improvement. Your district's survey results, especially when used in conjunction with other data at your disposal, can provide insightful information for use in decision-making and improvement planning. A few tips for reviewing your survey data include the following:

- Use the survey delivery and response statistics to set the context of your data.
- Review the "total agreement" by survey item to get a general sense of how well your district is doing in each of the six topic areas of the survey.
- Contrast "total agreement" with "high-level agreement" in order to identify survey items where the total percentage may include a sizable lukewarm response (i.e., slightly agree).
- Examine parents' comments for areas of satisfaction, areas of concern, and suggested improvement steps.
- Consider how your district's results compare to the overall statewide results.

<sup>1</sup> The Parent Work Group is a statewide stakeholder group that examines parent involvement data as an indicator of parent satisfaction for annual reporting to the Office of Special Education Programs.

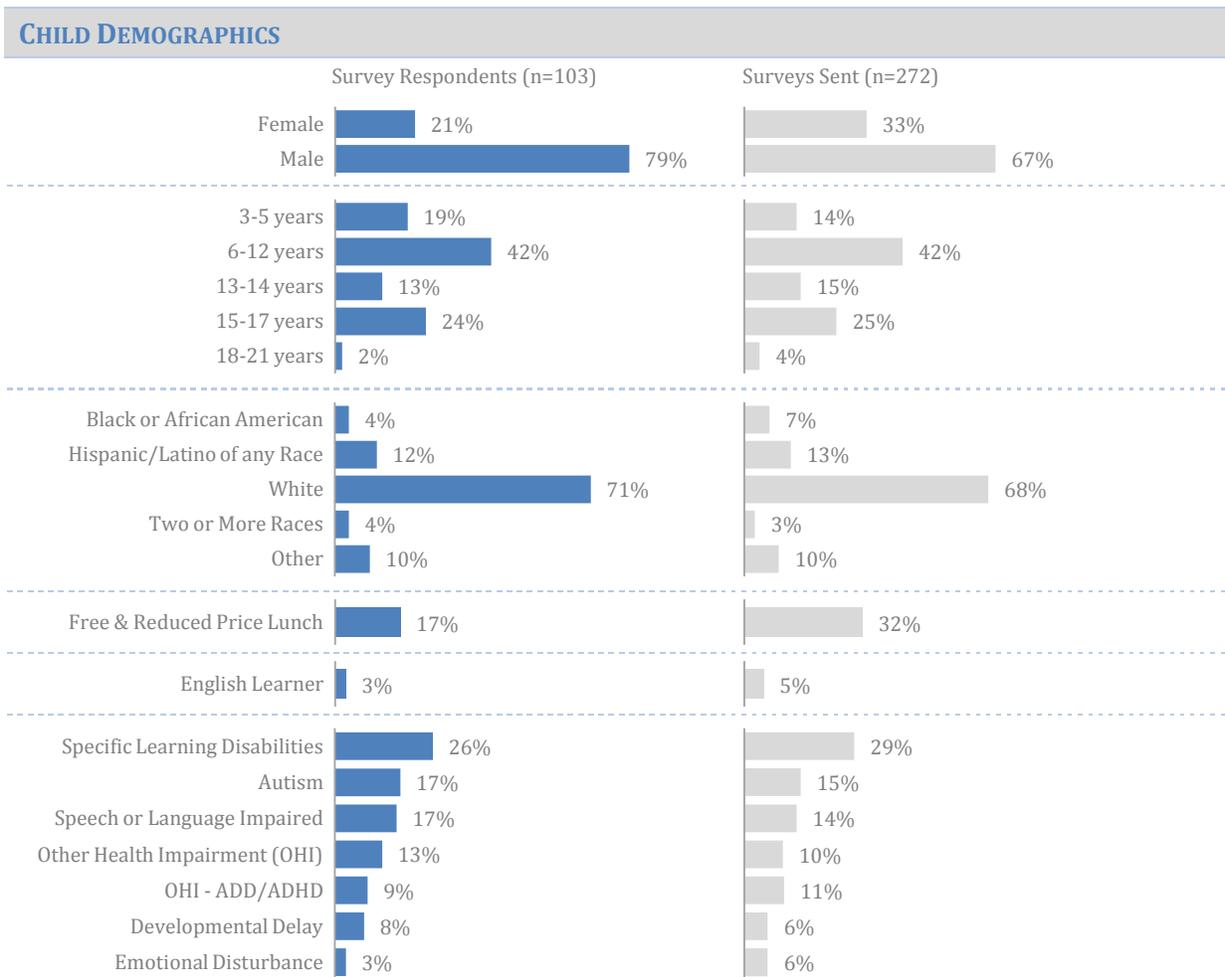

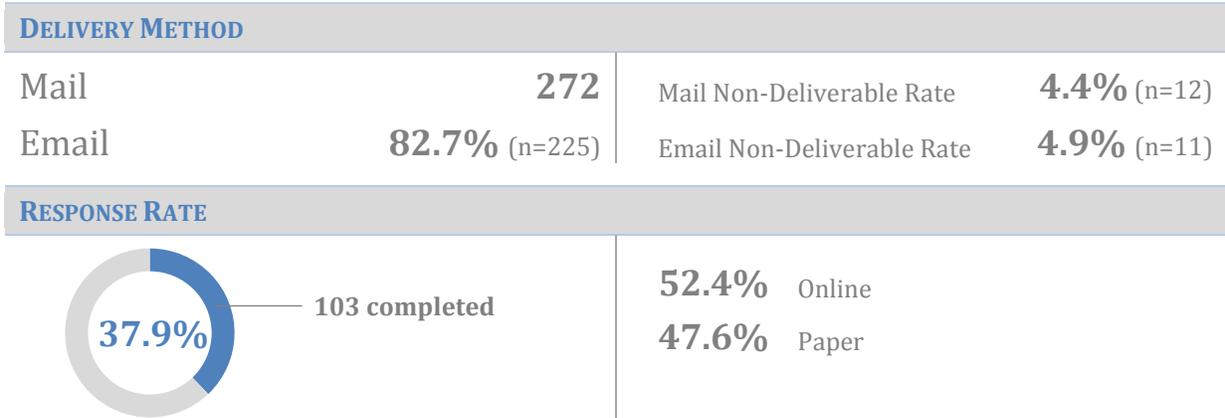

<sup>2</sup> In the majority (n=45) of districts, surveys were sent to all parents of children receiving services. However, in 11 districts, a simple random sample of students was selected. (See Appendix B.1 for more information.)

<sup>3</sup> SPP Indicator 8 measures the percent of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities. Survey item 10 is the primary measure for this indicator.

<sup>4</sup> The 2014-15 Connecticut Special Education Parent Survey Statewide Report will be available on the Department website in early 2016.

## SECTION I: SURVEY DELIVERY AND RESPONSE

In August 2015, the 2014-15 Connecticut Special Education Parent Survey was distributed to parents of children with an Individualized Education Program (IEP) or Services Plan. Parents were mailed a survey packet, with some parents also receiving an email about the survey. All materials were available in English and Spanish, and the survey could be completed on paper or online. The survey deadline was September 18, 2015. The following graphics provide survey delivery and response statistics for the Rocky Hill Nexus District.

Note: The disabilities displayed are those that are 5% or greater in the survey respondent group or the survey sent group.

## SECTION II: SURVEY RESULTS

The 2014-15 survey included 38 items that asked parents to rate on a 6-point scale from “strongly disagree” to “strongly agree” their experiences with their child’s special education program over the past 12 months.<sup>5</sup> The following tables include bar charts that illustrate parents’ “high level of agreement” (i.e., strongly agree and moderately agree), as well as a column with the percentage to express “total agreement” (i.e., plus slightly agree). Only the agreement response options are included to allow for a quick visual comparison across survey items; however, all response options for the Rocky Hill Nexus District are included in Appendix A.1.

	HIGH LEVEL OF AGREEMENT	TOTAL AGREEMENT
<i>Satisfaction with My Child’s Program</i>		
1. I am satisfied with my child’s overall special education program. [n=102]	45.1% 78.4%	89.2%

## SECTION III: PARENT COMMENTS

An open-ended section at the end of the survey asked parents to comment on their overall experience with their child’s special education program. Of the 103 surveys completed by parents in the Rocky Hill Nexus District, 43.7% (n=45) included written comments. The comments were classified according to a 4-point rubric: “1” if the comment conveyed complete dissatisfaction; “2” if mostly dissatisfied; “3” if mostly satisfied; and “4” if the comment conveyed complete satisfaction. The breakout along the 4-point rubric is provided below, followed by examples of parents’ feedback.<sup>6</sup>

Note: The comments of two respondents were not coded because the remarks could not be classified as either a reflection of satisfaction or dissatisfaction with their child’s program.

### COMMENTS EXPRESSING SATISFACTION

- *West Hill School has provided a warm, welcoming and beneficial elementary experience for my daughter. Her special education and regular education teachers have been outstanding! They help my daughter keep a positive attitude and feel accomplished even with the academic struggles she faces on a daily basis. I appreciate the genuine caring and compassionate nature of the teachers at the school.*
- *The special services department in Rocky Hill have been a great asset for both my daughter and family. She has steadily progressed with favorable results. Caring staff and well-structured program. It's making a difference.*
- *My child showed lots of improvement after attending the West Hill Elementary school's Pre-K program Bright Beginnings. Excellent staff, very cooperative and knowledgeable on kids' education. I hope every needy child gets access to this program.*
- *I am generally satisfied with the services my son receives. If I ever have any concerns, the school is very open to discussing those concerns with me and working out a viable solution with me.*
- *Our special education team is wonderful! They have pulled together to help my daughter with her autism. I am using some of the coping skills at home and they seem to help.*
- *In elementary and middle school years, switching to a new special education teacher each year was very difficult. It's much better now in high school where we have been assigned the same special education teacher for all four years. Consistency and someone who knows your child well is very important.*
- *The Rocky Hill School District has wonderful educators who are willing to do whatever it takes to help my child.*
- *Our town has done a great job with pulling together after school/parks and recreation activities for kids with special needs with older peers as models/supports. This didn't come from our special education department, but more from the superintendent working with families, Board of Education members, and parks and recreation staff. We also have a unified sports program in place at my son's school that was facilitated by our school principal and it has special education kids with typical peers their age.*
- *Rocky Hill's special education services go above and beyond to help my child be successful in school and outside of school.*
- *I would like to express my gratitude for all the tremendous assistance my child has received in the past years. The administrator/designee from the Rocky Hill district has been so wonderful in every way. Thank you!*

<sup>6</sup> Comments are reported verbatim with the following exceptions: 1) comments received in Spanish were translated; 2) silent corrections were made to improve readability; and 3) all identifying information was removed to maintain respondent confidentiality. In some cases, multiple excerpts may have been taken from one or more respondents’ comments.

- *The special education teachers are in tune with my child's needs and go above and beyond for him to get what he needs to learn. My child did ok in another district, but really improved in Rocky Hill. He is an honor roll student and an exemplary unified sports athlete. I could write a novel praising the special education teams at Rocky Hill – they don't need to change a thing! I love the fact that they integrate technology and still use good basic teaching principles.*
- *Overall, we are happy with our child's school and the help and care they have given him. We are happy and we see improvement in our child's condition, which we are grateful for. The school and staff overall have been excellent!*

#### COMMENTS EXPRESSING DISSATISFACTION

- *I personally take the IEP and pull it apart before the meeting, writing my questions down, asking for the goals to be more specific than broad. My opinion is that PPTs should walk through each goal and status, and not be a general "how he is doing." If they take the time to write/pick goals then we should walk through them individually. I look at his school support, and my husband and I, as his "team." I realize that I cannot do it without them, and they can't succeed without me reinforcing the work at home.*
- *The school system thus far has been very frustrating to deal with. I have encountered people who prioritize their egos over my child's education, who insist that they know all they need to know about his disability, and refuse to consider very relevant information, and refuse to provide appropriate services. They do not want to hear anything from me. I have to fight for every bit of information I get from the school. I know the school has people who are trying hard for him, but they are ill-equipped, uninformed, and they really do not want parental involvement at all.*
- *Teachers need to listen to the children and need training on recognizing the signs of a near shutdown for autistic children. Every year it seems that teachers are not properly trained in this area and it becomes frustrating for both the child and parent, as well as school officials. Also, teachers appear to need training on re-directing.*
- *I do not agree with placing 50% of special education students in our classrooms and calling this inclusion. Special education teachers are overworked and this is the district's solution to meet mandated hours.*
- *I was disappointed when Rocky Hill did not provide my child with an environment that was as "normal" as possible. I feel that they restricted students based on disabilities and ignored parents' suggestions, knowledge, and expertise about our children. I wish we had another option for our child.*
- *At times, I felt like I had lost communication with the staff at my son's school. I thought no news was good news – which was not the case. By the time any issues were being brought to my attention and addressed – it was the end of the school year and a little too late. So far, this year seems to be off to a better start as I made it very clear that I want to be made aware of any and all issues – big or small.*
- *One of the biggest things I feel that needs to be worked on, especially for my son, is more social interaction for him. Kids might say hello, but he is often left out or socially isolated. He craves more than a hello. For the majority of students within the grade, they could be taught more on accepting and including, along with paras learning how to facilitate social interactions more and knowing when to step back a bit.*

## APPENDIX A.2: ROCKY HILL BOX-AND-WHISKER CHARTS

The following box-and-whisker charts provide a visual snapshot (by survey item) of your district's mean score relative to the mean score of all other districts participating in the survey.<sup>7</sup> The mean district score represents the average parent response scaled from 1="strongly disagree" to 6="strongly agree."<sup>8</sup> An illustration of how to interpret your box-and-whisker charts is provided in the following diagram. A box for each survey item contains the middle 50% of districts and the median (middle) district score is represented by a black line within the box.<sup>9</sup> The "whiskers" on the box represent the minimum and maximum mean scores across all districts and your individual district is represented by a round dot (●). Thus, if your mean district score was inside the box, it would be considered an average rating; if your mean district score was in the lower "whisker," it would be considered a below average rating; and if your mean district score was in the upper "whisker," it would be considered an above average rating. Mean district scores were not calculated when five or fewer respondents in the district answered an item. If this was true of your district, a round dot (●) will be missing for those items.<sup>10</sup>

### How to Interpret Your Box-and-Whisker Chart

□ Contains the middle 50% of mean district scores on Question 1.

● Represents the mean score for your district on Question 1.

**Result:** The mean score for your district is below the mean score of the "middle" scoring district but is within the middle 50% of all mean district scores for this question.

Note: The mean district score represents the average response scaled from 1="strongly disagree" to 6="strongly agree."

<sup>7</sup> Survey responses from 11 districts were excluded due to the CSDE standard (n=20) for confidential reporting of district-level data.

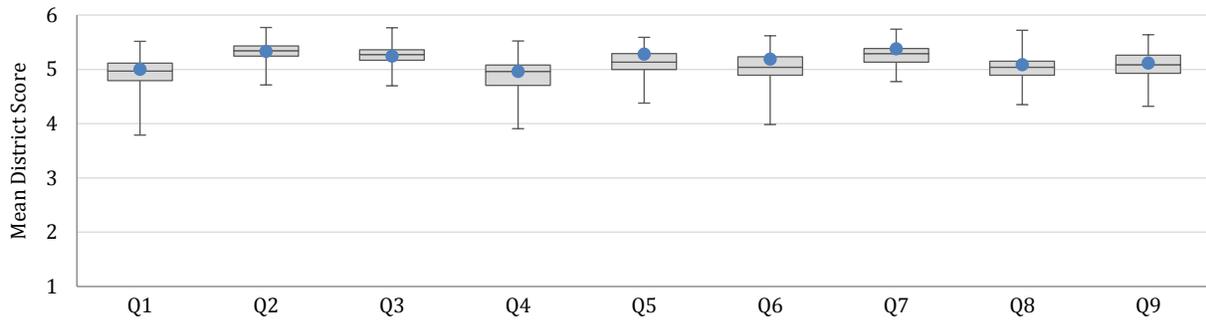

<sup>8</sup> The response option of "don't know" was not included in the calculation of the mean score, as there is no intuitive ordering for this response.

<sup>9</sup> Survey item 22 is negatively keyed (i.e., strongly agree is equivalent to a high level of dissatisfaction); therefore, this item was excluded from the analysis to maintain a consistent interpretation of mean scores.

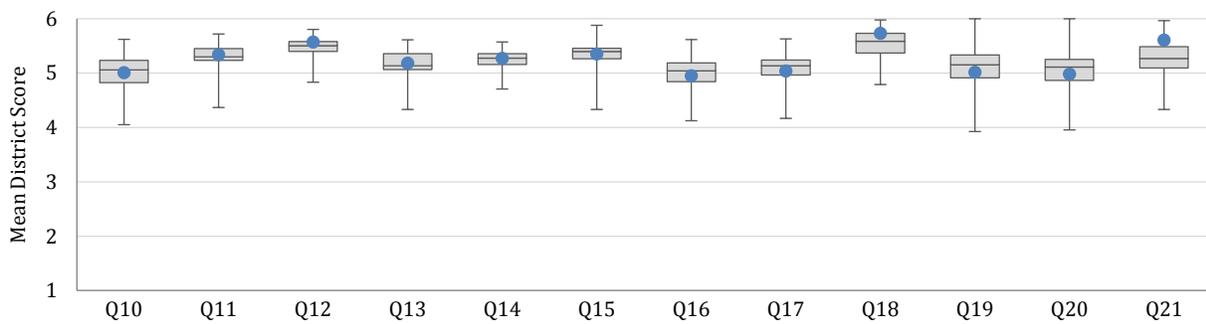

<sup>10</sup> A substantial number of districts had five or fewer respondents on the transition planning items. As a result, 15 districts were excluded from calculations for survey item 32 and seven districts were excluded from calculations for survey items 33-38.
