CONNECTICUT SPECIAL EDUCATION PARENT SURVEY

DATA BRIEF

Wethersfield Nexus District

PREPARED BY: GLEN MARTIN ASSOCIATES
41 STATE STREET, SUITE 604-02
ALBANY, NY 12207

INTRODUCTION

The Connecticut Special Education Parent Survey is the continuation of an ongoing collaborative effort between the Bureau of Special Education and the Connecticut Parent Work Group to collect information on family satisfaction and parents' involvement in their child's special education program.¹ The 2014-15 survey was sent to 18,634 parents of children receiving special education services, ages 3 through 21, across 56 school districts.² A total of 3,965 surveys were returned, representing a response rate of 21.3%. The survey is in its tenth year, with the 2014-15 school year marking the first year of a new three-year survey cohort cycle. The survey continues to serve as the chief instrument for collecting parent involvement data for Indicator 8 of the state's IDEA Part B State Performance Plan (SPP).³

PURPOSE OF THIS REPORT

The purpose of this report is to provide survey results for the Wethersfield Nexus District in an easy-to-use format.⁴ The intent is to highlight potential areas of strength for your district and areas that may need improvement. Your district's survey results, especially when used in conjunction with other data at your disposal, can provide insightful information for use in decision-making and improvement planning. A few tips for reviewing your survey data include the following:

- Use the survey delivery and response statistics to set the context of your data.
- Review the "total agreement" by survey item to get a general sense of how well your district is doing in each of the six topic areas of the survey.
- Contrast "total agreement" with "high-level agreement" in order to identify survey items where the total percentage may include a sizable lukewarm response (i.e., slightly agree).
- Examine parents' comments for areas of satisfaction, areas of concern, and suggested improvement steps.
- Consider how your district's results compare to the overall statewide results.

¹ The Parent Work Group is a statewide stakeholder group that examines parent involvement data as an indicator of parent satisfaction for annual reporting to the Office of Special Education Programs.

² In the majority (n=45) of districts, surveys were sent to all parents of children receiving services. However, in 11 districts, a simple random sample of students was selected. (See Appendix B.1 for more information.)

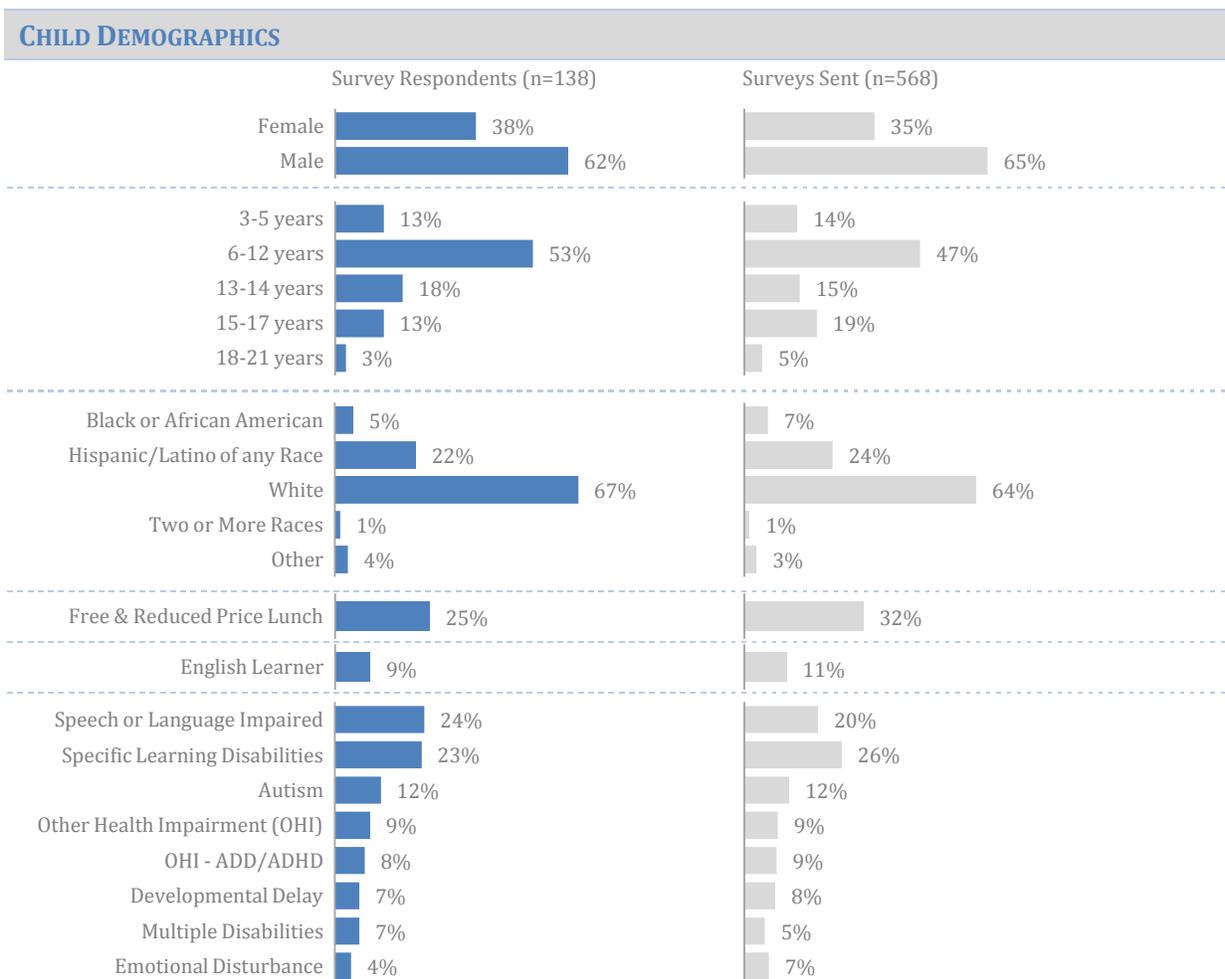

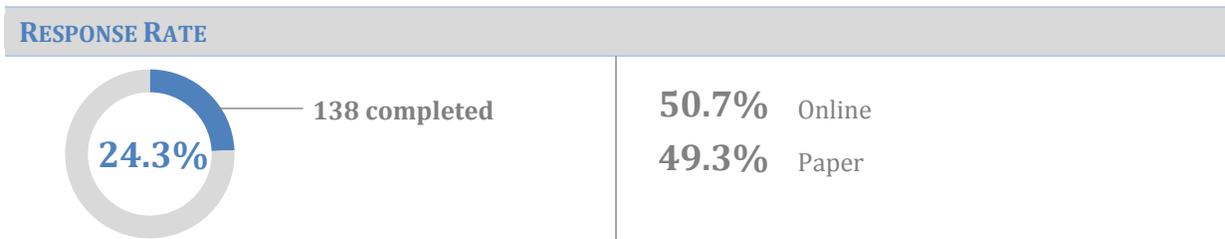

³ SPP Indicator 8 measures the percent of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities. Survey item 10 is the primary measure for this indicator.

⁴ The 2014-15 Connecticut Special Education Parent Survey Statewide Report will be available on the Department website in early 2016.

SECTION I: SURVEY DELIVERY AND RESPONSE

In August 2015, the 2014-15 Connecticut Special Education Parent Survey was distributed to parents of children with an Individualized Education Program (IEP) or Services Plan. Parents were mailed a survey packet, with some parents also receiving an email about the survey. All materials were available in English and Spanish, and the survey could be completed on paper or online. The survey deadline was September 18, 2015. The following graphics provide survey delivery and response statistics for the Wethersfield Nexus District.

DELIVERY METHOD			
Mail	568	Mail Non-Deliverable Rate	1.1% (n=6)
Email	83.5% (n=474)	Email Non-Deliverable Rate	7.0% (n=33)

Note: The disabilities displayed are those that are 5% or greater in the survey respondent group or the survey sent group.

SECTION II: SURVEY RESULTS

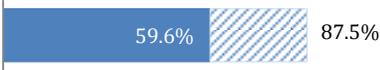

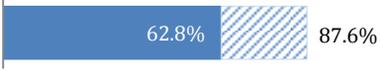

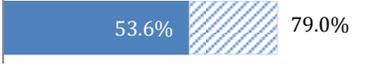

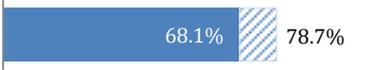

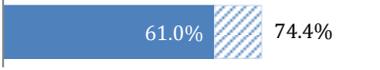

The 2014-15 survey included 38 items that asked parents to rate on a 6-point scale from “strongly disagree” to “strongly agree” their experiences with their child’s special education program over the past 12 months.⁵ The following tables include bar charts that illustrate parents’ “high level of agreement” (i.e., strongly agree and moderately agree), as well as a column with the percentage to express “total agreement” (i.e., plus slightly agree). Only the agreement response options are included to allow for a quick visual comparison across survey items; however, all response options for the Wethersfield Nexus District are included in Appendix A.1.

	HIGH LEVEL OF AGREEMENT	TOTAL AGREEMENT
<i>Satisfaction with My Child’s Program</i>		
1. I am satisfied with my child’s overall special education program. [n=138]	47.1% 77.5%	89.1%

SECTION III: PARENT COMMENTS

An open-ended section at the end of the survey asked parents to comment on their overall experience with their child’s special education program. Of the 138 surveys completed by parents in the Wethersfield Nexus District, 33.3% (n=46) included written comments. The comments were classified according to a 4-point rubric: “1” if the comment conveyed complete dissatisfaction; “2” if mostly dissatisfied; “3” if mostly satisfied; and “4” if the comment conveyed complete satisfaction. The breakout along the 4-point rubric is provided below, followed by examples of parents’ feedback.⁶

COMMENTS EXPRESSING SATISFACTION

- *My child has the opportunity to interact and learn with students his age, as well as being removed from the class for further help in smaller groups. He has had great improvement since he started with the Wethersfield school system.*
- *My child gets the best services I could ask for. Everyone is attentive to his every need. I am thankful to all the teachers who take care of him.*
- *We are very pleased with the services we are being provided. Our IEP meetings are productive and I feel listened to as a parent. It's definitely a team approach, very supportive. The school staff are very accommodating if I have any questions or concerns.*
- *The most wonderful, helpful thing Wethersfield does is assign him a patient and approachable special education teacher. She meets with him two or three times per week to help him organize and prioritize his work. She helps him one-on-one with anything he's failing. This teacher also is my parent-teacher liaison, so when I see the "Ds" and "Fs" appearing on PowerSchool on a daily or weekly basis, I call or email her and she investigates where the problem lies and how to rectify it.*
- *Overall, my husband and I could not be more pleased with the education that our daughter is receiving. From Birth to Three to the transition into the Wethersfield Public Schools, our daughter has been made to feel very special and important. My whole family is amazed at how far she has come already.*
- *I have found my child's special education program to be very instrumental in his overall social and academic growth. My son has grown with a deeper understanding of his handicap with the help of the special education professionals working with him. Because he has worked with consistent staff, they have been able to help him much more because they've seen the growth pattern, both socially and academically, over multiple years (not just one). This is crucial to a child with special needs.*
- *Since my son began kindergarten in the Wethersfield school system we have been blessed with the most caring individuals. They took the time to understand his needs and also worked with me to help him as much as possible. I can't be happier with my son's special education teams. They have been outstanding!*

COMMENTS EXPRESSING DISSATISFACTION

- *My child struggles to benefit from the paraprofessional program. He felt it stigmatized him and it actually interfered with his natural ability to learn. In my experience, I would not recommend implementation of this program for children above the elementary age.*
- *No parent training offered. No support network.*
- *My child needs more vocational skills. He is in high school and reads on a 2nd-3rd grade level. The teacher still talks "college" to him, which is totally unrealistic. He needs a life skill, like carpentry, or masonry or anything else*

⁶ Comments are reported verbatim with the following exceptions: 1) comments received in Spanish were translated; 2) silent corrections were made to improve readability; and 3) all identifying information was removed to maintain respondent confidentiality. In some cases, multiple excerpts may have been taken from one or more respondents' comments.

that will help him have a successful job that does not involve college. More "realism" and less "idealism" will help students in the long run. This is not shortchanging them, just giving them realistic and attainable goals.

- *My son's IEPs are always late – beyond the 10 days. His goals are not appropriate. He is often penalized when he does not write enough even though his IEP is for writing.*
- *There is too much transition at my son's school and at the Board of Education offices every year. Planning and implementation is inconsistent. When the paraprofessionals are moved around, I am never told, and several times throughout the year it was apparent they were not trained nor able to help my son appropriately. Last year, out of his whole PPT team (principal, teachers, special education teachers, board of education representative, and specialists) there was only one person, besides myself, that had been there the year before.*
- *There has been too much turnover with school staff this past year. The general education teacher was not capable of supporting the learning and teaching environment for my son. The school claimed they did not have enough staff to provide my son his services. He did not receive services as needed this past year.*
- *Teachers have not been responsive to communication. At the PPT meeting, I had to set up a separate meeting to speak about my child's course requirements with her guidance counselor.*
- *I feel that my son's school district is trying hard to address his learning disability. However, I feel there's a lot about the process that I don't understand. I am frustrated by the lack of a support groups in our town. We've resorted to "hiring" a parent advocate to attend monthly consults and PPTs.*
- *I feel there is much room for improvement in communication with staff and parents about modification of classroom work, speech, and OT especially. I have seen minimal improvement in social skills as well as her learning how to care for herself. I don't feel there is enough time spent on her disability and not enough qualified staff for the amount of children.*
- *More time should have been given for the transitional PPT meeting – 30 minutes was not enough time to go over all the information. Communication in general could be improved.*
- *Wethersfield is not a pleasant school system to work with. They are disrespectful to parents and do not have a student's best interest at heart. They do not follow through with what they say they are going to do. I am saddened with how the special education department runs in Wethersfield Public Schools. It has not been a pleasant experience and there is no reason for it to be that way.*
- *Sensory processing is an area that we have found to be highly misunderstood. My child's sensory issues were treated as a behavior problem. Accommodations were misunderstood, so they were implemented incorrectly and my child's self-esteem and social standing plummeted. We have obtained and paid for multiple, outside services to supplement a poor program, so that our child's needs can be met. More training is necessary to help teachers understand and meet these needs.*

APPENDIX A.2: WETHERSFIELD BOX-AND-WHISKER CHARTS

The following box-and-whisker charts provide a visual snapshot (by survey item) of your district's mean score relative to the mean score of all other districts participating in the survey.⁷ The mean district score represents the average parent response scaled from 1="strongly disagree" to 6="strongly agree."⁸ An illustration of how to interpret your box-and-whisker charts is provided in the following diagram. A box for each survey item contains the middle 50% of districts and the median (middle) district score is represented by a black line within the box.⁹ The "whiskers" on the box represent the minimum and maximum mean scores across all districts and your individual district is represented by a round dot (●). Thus, if your mean district score was inside the box, it would be considered an average rating; if your mean district score was in the lower "whisker," it would be considered a below average rating; and if your mean district score was in the upper "whisker," it would be considered an above average rating. Mean district scores were not calculated when five or fewer respondents in the district answered an item. If this was true of your district, a round dot (●) will be missing for those items.¹⁰

How to Interpret Your Box-and-Whisker Chart

□ Contains the middle 50% of mean district scores on Question 1.

● Represents the mean score for your district on Question 1.

Result: The mean score for your district is below the mean score of the "middle" scoring district but is within the middle 50% of all mean district scores for this question.

Note: The mean district score represents the average response scaled from 1="strongly disagree" to 6="strongly agree."

⁷ Survey responses from 11 districts were excluded due to the CSDE standard (n=20) for confidential reporting of district-level data.

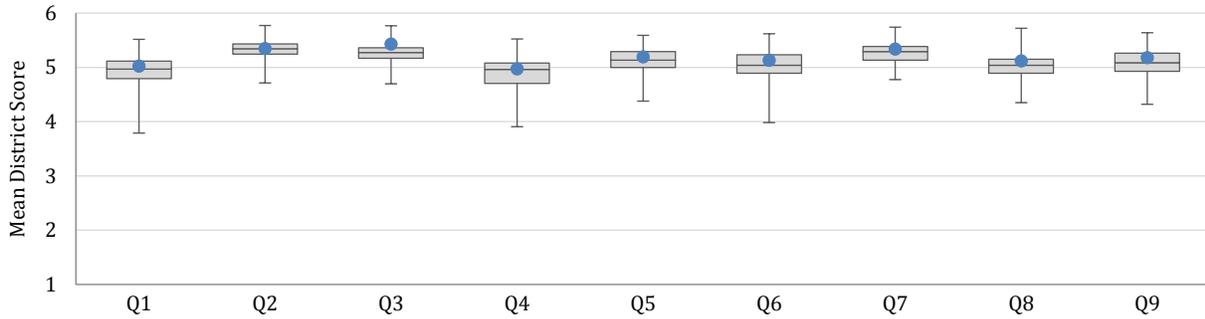

⁸ The response option of "don't know" was not included in the calculation of the mean score, as there is no intuitive ordering for this response.

⁹ Survey item 22 is negatively keyed (i.e., strongly agree is equivalent to a high level of dissatisfaction); therefore, this item was excluded from the analysis to maintain a consistent interpretation of mean scores.

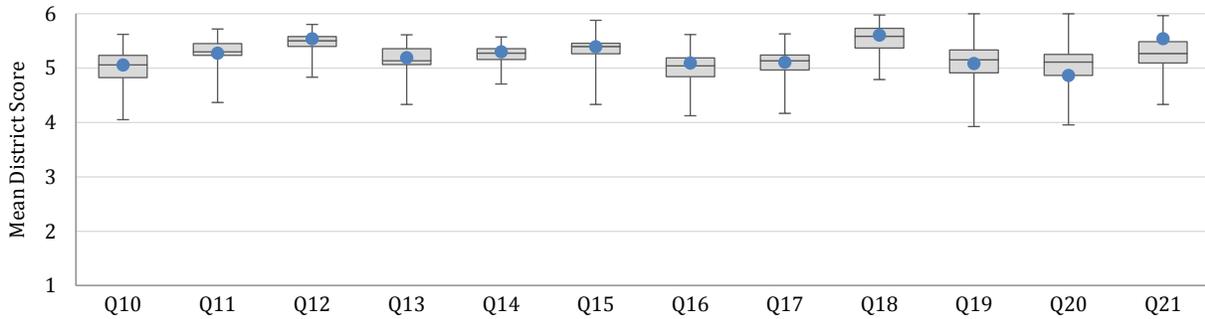

¹⁰ A substantial number of districts had five or fewer respondents on the transition planning items. As a result, 15 districts were excluded from calculations for survey item 32 and seven districts were excluded from calculations for survey items 33-38.
