## INTRODUCTION

The Connecticut Special Education Parent Survey is the continuation of an ongoing collaborative effort between the Bureau of Special Education and the Connecticut Parent Work Group to collect information on family satisfaction and parents' involvement in their child's special education program.<sup>1</sup> The 2014-15 survey was sent to 18,634 parents of children receiving special education services, ages 3 through 21, across 56 school districts.<sup>2</sup> A total of 3,965 surveys were returned, representing a response rate of 21.3%. The survey is in its tenth year, with the 2014-15 school year marking the first year of a new three-year survey cohort cycle. The survey continues to serve as the chief instrument for collecting parent involvement data for Indicator 8 of the state's IDEA Part B State Performance Plan (SPP).<sup>3</sup>

## PURPOSE OF THIS REPORT

The purpose of this report is to provide survey results for the Windsor Nexus District in an easy-to-use format.<sup>4</sup> The intent is to highlight potential areas of strength for your district and areas that may need improvement. Your district's survey results, especially when used in conjunction with other data at your disposal, can provide insightful information for use in decision-making and improvement planning. A few tips for reviewing your survey data include the following:

- Use the survey delivery and response statistics to set the context of your data.
- Review the "total agreement" by survey item to get a general sense of how well your district is doing in each of the six topic areas of the survey.
- Contrast "total agreement" with "high-level agreement" in order to identify survey items where the total percentage may include a sizable lukewarm response (i.e., slightly agree).
- Examine parents' comments for areas of satisfaction, areas of concern, and suggested improvement steps.
- Consider how your district's results compare to the overall statewide results.

<sup>1</sup> The Parent Work Group is a statewide stakeholder group that examines parent involvement data as an indicator of parent satisfaction for annual reporting to the Office of Special Education Programs.

<sup>2</sup> In the majority (n=45) of districts, surveys were sent to all parents of children receiving services. However, in 11 districts, a simple random sample of students was selected. (See Appendix B.1 for more information.)

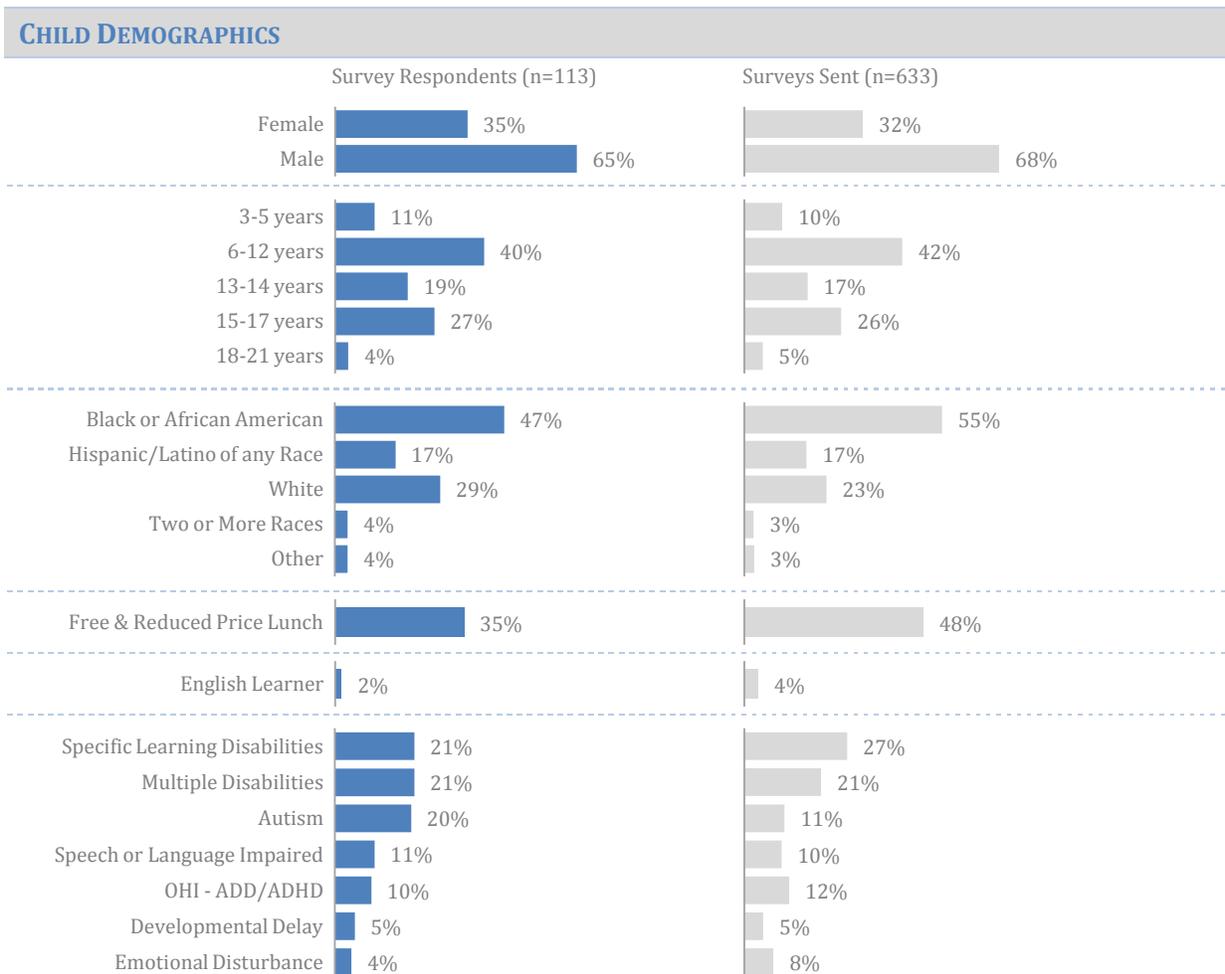

<sup>3</sup> SPP Indicator 8 measures the percent of parents with a child receiving special education services who report that schools facilitated parent involvement as a means of improving services and results for children with disabilities. Survey item 10 is the primary measure for this indicator.

<sup>4</sup> The 2014-15 Connecticut Special Education Parent Survey Statewide Report will be available on the Department website in early 2016.

## SECTION I: SURVEY DELIVERY AND RESPONSE

In August 2015, the 2014-15 Connecticut Special Education Parent Survey was distributed to parents of children with an Individualized Education Program (IEP) or Services Plan. Parents were mailed a survey packet, with some parents also receiving an email about the survey. All materials were available in English and Spanish, and the survey could be completed on paper or online. The survey deadline was September 18, 2015. The following graphics provide survey delivery and response statistics for the Windsor Nexus District.

DELIVERY METHOD			
Mail	633	Mail Non-Deliverable Rate	2.8% (n=18)
Email	73.8% (n=467)	Email Non-Deliverable Rate	9.4% (n=44)

Note: The disabilities displayed are those that are 5% or greater in the survey respondent group or the survey sent group.

## SECTION II: SURVEY RESULTS

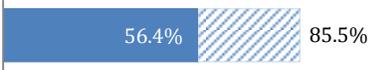

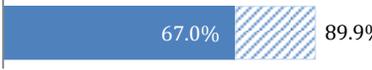

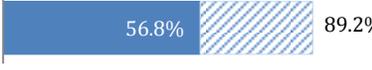

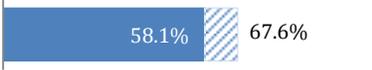

The 2014-15 survey included 38 items that asked parents to rate on a 6-point scale from “strongly disagree” to “strongly agree” their experiences with their child’s special education program over the past 12 months.<sup>5</sup> The following tables include bar charts that illustrate parents’ “high level of agreement” (i.e., strongly agree and moderately agree), as well as a column with the percentage to express “total agreement” (i.e., plus slightly agree). Only the agreement response options are included to allow for a quick visual comparison across survey items; however, all response options for the Windsor Nexus District are included in Appendix A.1.

	HIGH LEVEL OF AGREEMENT	TOTAL AGREEMENT
<i>Satisfaction with My Child’s Program</i>		
1. I am satisfied with my child’s overall special education program. [n=112]	 46.4% 83.3%	92.9%

## SECTION III: PARENT COMMENTS

An open-ended section at the end of the survey asked parents to comment on their overall experience with their child’s special education program. Of the 113 surveys completed by parents in the Windsor Nexus District, 34.5% (n=39) included written comments. The comments were classified according to a 4-point rubric: “1” if the comment conveyed complete dissatisfaction; “2” if mostly dissatisfied; “3” if mostly satisfied; and “4” if the comment conveyed complete satisfaction. The breakout along the 4-point rubric is provided below, followed by examples of parents’ feedback.<sup>6</sup>

Note: The comment of one respondent was not coded because the remark could not be classified as either a reflection of satisfaction or dissatisfaction with their child’s program.

### COMMENTS EXPRESSING SATISFACTION

- *I am satisfied with the total communication model and holistic approach to my child's education and enrichment experiences. He is part of a wonderful community.*
- *I have seen great improvements in my son since he started the preschool program. At this time, I am satisfied with the assistance given by the school and look forward to more experiences that are positive for years to come.*
- *The needs of my child are well-taken care of by the school and the staff. As her mom, I am very pleased with her progress at school.*
- *I am satisfied with the amount of assistance my son has received since his transition to Windsor. He has received the help and understanding that other schools were not able to find or figure out. I am thankful for all the teachers and staff in helping my son accomplish his goals.*
- *The people we deal with regarding the services for our child have always been very helpful in planning and implementing a supportive program for our child. We understand how difficult it can be to predict what services and activities will best foster future development.*
- *The Windsor team has done an amazing job in working together with us in order to give our son the best developmental plan. All those involved have followed through on every task. I'm so happy to report what an outstanding team my son has backing him. He has come leaps and bounds and he just keeps getting better all due to the tremendous support we have received. I hope that all families have received the care and thoughtfulness that we have received!*
- *As a parent, I feel that my input is crucial and beneficial to my child's success in school. It's important to be the voice that says "this is how my child should learn." Teachers, paraprofessionals and myself make suggestions, build on suggestions, focus on the classroom setting, and discuss essential life skills to teach until a mutual decision is reached by all. I appreciate the willingness to implement a learning style geared specifically towards my son's learning. Communication is key – and always will be.*
- *My son has been blessed throughout his school years with highly educated and wonderful teachers who take my son's issues seriously.*

### COMMENTS EXPRESSING DISSATISFACTION

- *I feel like overall the experience is good but there have been times where I need information from teachers regarding my son's grades and no response is given and it takes several attempts, with the help of others, before a response is given. It gets frustrating and I feel like some just do not care.*

---

<sup>6</sup> Comments are reported verbatim with the following exceptions: 1) comments received in Spanish were translated; 2) silent corrections were made to improve readability; and 3) all identifying information was removed to maintain respondent confidentiality. In some cases, multiple excerpts may have been taken from one or more respondents' comments.

- *Several years ago, I noticed that my child was not reading at grade level. I discussed it with the teacher several times and nothing was done until I put it in writing. Once a meeting was called, I was treated rudely and assumptions were made about my child without the principal knowing him. All he needed was assistance in reading. I had to fight to get help for my child.*
- *I find that there is not much help for special education development at the college level. Attempting to find work is very difficult and there is no assistance in the enrollment process for students transitioning to college.*
- *The district does not help my child to read and write. They do not provide specific programs to help with decoding, reading comprehension and writing. There aren't any after school homework clubs. Currently we pay a private tutor to help teach our daughter how to read and write.*
- *My daughter was not receiving her speech services as laid out in her IEP for a month. When trying to contact her speech teacher I was told she was now seeing a new therapist but I had never been notified. When trying to contact the principal I had difficulties getting a response. Finally, after my interventions I was able to get things back in place.*
- *More encouragement and involvement of parents would be good. More opportunity for meeting other parents in my child's classroom (not during work hours) would be good.*
- *Paraprofessionals are untrained and shuffled around so that the kids sometimes have 3-4 different one-to-ones in a week. This is very stressful for kids and for classroom teachers. Summer programing is totally inadequate. My child has social issues, but not academic, and all they offered is the academic. There's no attempt to help mildly disabled kids in a supportive summer program.*
- *I'm not aware of a single school program that helps kids work on their IEP goals and objectives outside of the regular school hours.*

## APPENDIX A.2: WINDSOR BOX-AND-WHISKER CHARTS

The following box-and-whisker charts provide a visual snapshot (by survey item) of your district's mean score relative to the mean score of all other districts participating in the survey.<sup>7</sup> The mean district score represents the average parent response scaled from 1="strongly disagree" to 6="strongly agree."<sup>8</sup> An illustration of how to interpret your box-and-whisker charts is provided in the following diagram. A box for each survey item contains the middle 50% of districts and the median (middle) district score is represented by a black line within the box.<sup>9</sup> The "whiskers" on the box represent the minimum and maximum mean scores across all districts and your individual district is represented by a round dot (●). Thus, if your mean district score was inside the box, it would be considered an average rating; if your mean district score was in the lower "whisker," it would be considered a below average rating; and if your mean district score was in the upper "whisker," it would be considered an above average rating. Mean district scores were not calculated when five or fewer respondents in the district answered an item. If this was true of your district, a round dot (●) will be missing for those items.<sup>10</sup>

Note: The mean district score represents the average response scaled from 1="strongly disagree" to 6="strongly agree."

<sup>7</sup> Survey responses from 11 districts were excluded due to the CSDE standard (n=20) for confidential reporting of district-level data.

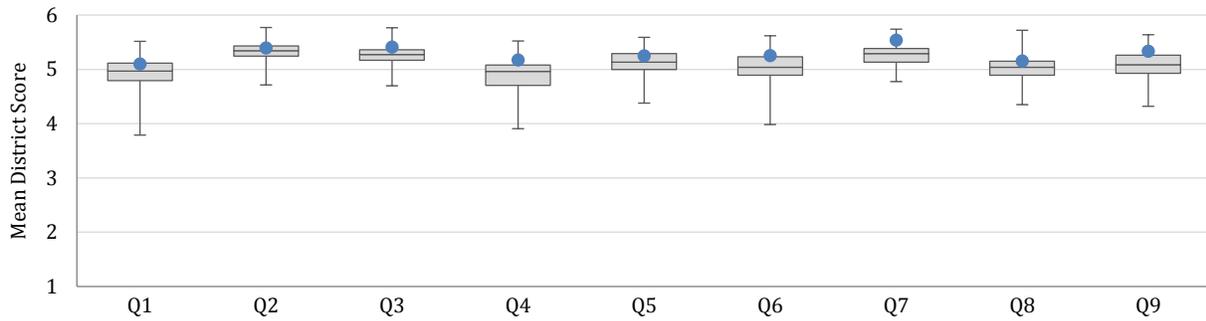

<sup>8</sup> The response option of "don't know" was not included in the calculation of the mean score, as there is no intuitive ordering for this response.

<sup>9</sup> Survey item 22 is negatively keyed (i.e., strongly agree is equivalent to a high level of dissatisfaction); therefore, this item was excluded from the analysis to maintain a consistent interpretation of mean scores.

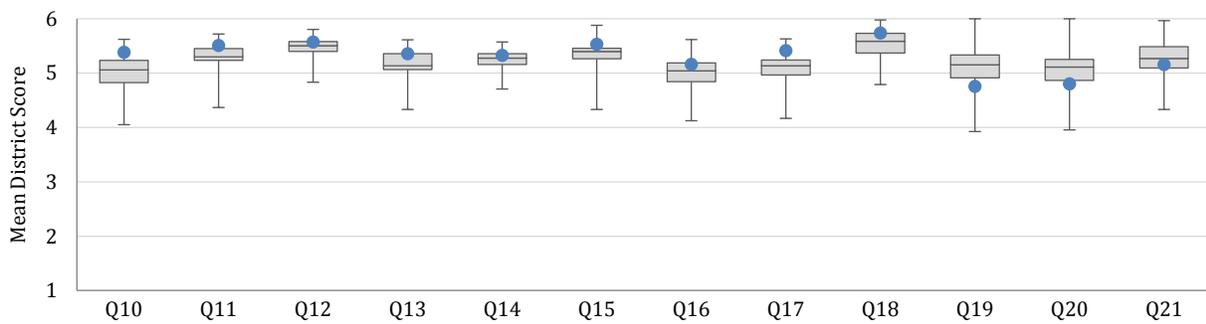

<sup>10</sup> A substantial number of districts had five or fewer respondents on the transition planning items. As a result, 15 districts were excluded from calculations for survey item 32 and seven districts were excluded from calculations for survey items 33-38.
