

CONNECTICUT MASTERY TESTING PROGRAM IN READING

Raw Score Conversions to DRP® Scores, National Percentiles, and Normal Curve Equivalent (NCEs) for Secure Degrees of Reading Power® (DRP) Test Forms CSC-3, CSC-4, CSC-5, CSC-6, CSC-7, and CSC-8

Secure DRP test forms CSC-3, CSC-4, CSC-5, CSC-6, CSC-7, and CSC-8, were administered in Grades 3 through 8 as part of the Spring 2008 administration of the Connecticut Mastery Testing (CMT) Program.

Please note that the Connecticut State Department of Education (CSDE) reports DRP test scores at different levels of comprehension in different grades:

Grades 3 and 4 @ P=.70

Grades 5 and 6 @ P=.75

Grades 7 and 8 @ P=.80

As a result, the performance of students on these DRP tests cannot be compared directly, unless the scores are converted to the same level of comprehension. Connecticut educators can use the DRP conversion tables in this booklet to convert DRP scores reported for CMT in grades 3 through 8 and make valid comparisons of student performance across these grades.

These DRP tests are being administered as part of the Fourth Generation CMT and share the characteristics of prior Fourth Generation forms. The range of DRP scores reported on Fourth Generation forms differs from that of earlier generations as well as that of prior DRP shelf forms. In the past, the lowest score reported on a DRP test was 15- and the highest score was 99+. For these forms, the lowest possible DRP score is 14 and the highest possible score is 100. Otherwise, DRP test results are reported on the same scale as those used in prior generations of the CMT as well as DRP shelf forms.

The DRP forms administered as part of the Fourth Generation CMT were designed specifically to be appropriate for students in Connecticut schools. Nevertheless, there will be occasions on which one or more students receives a very low score or a very high score. DRP test scores at the extremes of a test form (i.e., when a student scores near the top of the scale or near the bottom of the scale) should be interpreted cautiously.

DIRECTIONS

Assess Progress or Compare Performance Across Grades: DRP scores can be compared directly provided they are reported at the same level of comprehension. The first step in comparing DRP scores across grades is to decide which level of comprehension to use. The Independent Level (P=.90) indicates the difficulty of material that students can read on their own. The Instructional Levels (P=.70, P=.75, P=.80) indicate the difficulty of material that students can read with varying degrees of assistance.

If you want to convert all DRP scores on the CMT to the 7th & 8th Grade Mastery Level (P=.80), you will need to convert all the reported 3rd, 4th, 5th, and 6th grade scores.

For example, using the attached table for Grade 3 Test Form CSC-3:

1. Look up the 3rd grade DRP score under the column labeled 3rd & 4th Grade Mastery (P=.70).
2. Find, on the same line, the corresponding DRP score for Grade 8 under the column labeled 7th & 8th Grade Mastery (P=.80).

Similarly, using the attached table for Grade 6 Test Form CSC-6:

1. Look up the 6th grade DRP score under the column labeled 5th & 6th Grade Mastery (P=.75).
2. Find, on the same line, the corresponding DRP score for Grade 8 under the column labeled 7th & 8th Grade Mastery (P=.80).

In all of the attached tables, the P=.90 Level of Comprehension also has been provided for those who wish to interpret student reading performance in terms of the Independent Level of Comprehension.

Normative Scores: Normative data for DRP tests are published in the manual entitled *DRP Norms* (© 2000). Data included in the attached tables can be used to obtain the percentile rank and normal curve equivalent (NCE) that correspond to a given DRP score. For the 3rd grade CMT scores, for example, look at the table for test form CSC-3 and find the DRP score under the column labeled 3rd & 4th Grade Mastery (P=.70). The percentile rank and NCE that correspond to this DRP score are on the same line under the headings Gr. 3 %ile RANK and Gr. 3 NCE, respectively. Due to the fact that the CMT is administered in March, outside the testing window on which Fall and Spring norms are based, interpolated DRP norms are provided in this publication.

If you have any questions regarding the use of these tables, please feel free to call Questar at (800) 800-2598 or e-mail jschlange@QuestarAI.com at your convenience.

* Percentile Rank and NCE have been interpolated for March test administration.

Linking DRP Scores to Text Difficulty

The same scale that is used to report students' DRP test results (at various levels of comprehension) is used to measure the difficulty of text. Therefore, test results can be used to inform instruction.

For example, a student receiving a DRP score of 50 at P=.70 should be able to read a typical elementary school textbook (average difficulty 50 DRP units) or *Charlotte's Web* (50 DRP units) with normal classroom assistance. Students receiving lower scores may need additional help.

DRP difficulty values for more than 6,800 textbooks in current use are available on the Questar Website: www.QuestarAI.com.

DRP difficulty values for more than 36,000 works of literature and popular titles are available on DRP→BookLink® software.

DRP→BookLink is designed to help classroom teachers, reading specialists, librarians, and curriculum advisors identify books appropriate for their students' reading abilities. The database is updated each year with additional titles selected from award-winning authors. Each book has been analyzed for its text difficulty, indexed in terms of the age-appropriateness of the content, and assigned a value on the DRP Scale.

Copies of DRP→BookLink may be ordered from Questar, 4 Hardscrabble Heights, P.O. Box 382, Brewster, NY 10509.

DRP® Scale of Text Difficulty	
TEXTBOOKS & EXTRACURRICULAR MATERIALS	LITERATURE AND POPULAR TITLES
